

## 6) What is a CVV2 code

Wednesday, 06 September 2006

The CVV2 code is an added security feature which is widely used on the internet to prevent credit card fraud. On American Express cards, the 4-digit code is located on the front of the card. On VISA and MC, the code is the last 3 digits which appear on the back of your card, typically near the signature line (see below).
